To Whom It Concern

RE: Testimony for AIR EMage; Natural Air Purification System

Star Learners @ Bukit Panjang did repainting work for our gates, doors and window grills using oil based paint on 29 May 2018. As we used oil based paint, it results in strong paint smell.

We installed 7 sets of AIR eMage, Natural Air Purification System on 31 May 2018.

After 2 weeks of installation, parent feedback that the smell is almost totally gone and staff also noticed that there are fewer insects found in school.

Parents and staff both compliment on the pleasant smell that AIR EMage; Natural Air Purification System gives out.

Thank you AIR EMage; Natural Air Purification System for solving the paint smell issue for us.

Yours Sincerely,

Jane Law

Centre Principal
