Air eMage Testimonial

Air eMage was introduced to Star Learners @ Jurong West first then to Tanjong Pagar. I am pleased that it has indeed change the air quality for both centres.

There was an outbreak of HFMD in Jurong West and the children all fell sick due the the spread of virus. The moment we started the Air emage and on it 24hours a day, the number of HFMD cases dropped tremendously. Soon after, it stopped.

When I took over Tanjong Pagar, there was a stench especially at the shoe rack area as the place was fully air-conditioned without windows. Air eMage was installed and within a few days, the air was more refreshed. New children who joined the centre builds up their immunization system against new environment faster, instead of falling sick.

Mr Wildie Teo, the Director of Air eMage is very efficient in bringing the products into the school and prompt in the installation. He explains the benefit of the system with patience and friendliness. I highly recommend the Air eMage purification system to be installed for better air and better health.

Yours Sincerely,

Bao Zhen

Principal
Star Learners @ Tanjong Pagar
